SKILLS

I'm a full-stack developer with 5 years experience in ReactJS, PHP, HTML, and SCSS. That experience is leveraged in both product and agency environments, where I bring a mix of frontend craftsmanship and accessibility expertise. Additionally, I understand marketing automation and email systems from my time at Vendavo, where I built and tested email templates for campaigns and tracked performance metrics through Marketo and Google Analytics, which directly relates to your communication platform needs. Former supervisors and colleagues can attest to my diligence, technical expertise, and passion for continuous learning.

EXPERIENCE

Engrain, Denver CO - *Mid-level Web Developer*

SEPTEMBER 2022 - PRESENT

- Develop contact forms, event calendars, and various front-end features from Figma mockups using PHP, HTML, jQuery, and SCSS.
- Experience with meeting AAA compliance with WCAG by using contrast checkers and screen reader tools.
- Above proficient with understanding design systems and using component libraries for buttons, typography, etc. in Figma.
- Review product and design team Figma mockups for UX, WCAG compliance, LOE, and estimates on time to build out.
- Use GIT from the command line to standardize versions and notate pushes, and then using BitBucket to pull request branches for code review and merge into a testing environment.
- Use webpack to compile SCSS and JS files for new functionality, like new modals, pages, animations, etc.
- Highly experienced with responsive design and a mobile-first approach to building a frontend interface.

ESTUS Digital, Remote - *Frontend Developer*

MARCH 2020 - SEPTEMBER 2022

- Develop web applications from a Figma/Zepplin mockup using ReactJS, Laravel, HTML5 and CSS3/SCSS for the setup, structure and logic.
- Experience with using Redux for storing and reading states across multiple components.
- Use Tower, a GIT GUI, to version and notate pushes, and then pull requests those branches to senior developers for review.
- Update web applications and websites regularly with support tickets and QA checks from fellow developers and users.

Vendavo, Denver CO - *Digital Marketer*

JUNE 2019 - MARCH 2020

- Coded and tested autoresponder and email alert templates through Marketo.
- Report and measure engagement across landing pages, emails, digital campaigns, etc. using Google Analytics and Marketo statistics.
- Design support in the form of print, digital, HTML, CSS templates and other materials.
- Consistent and ongoing updates to the website via WordPress.
